Description of proposed system:

The ultimate goal of this project will be to replace the three existing radio systems under one P25 compliant 48 site system. The benefits of implementing this system include improving citywide communications and providing inter agency interoperability between City, County, Regional, and State and Federal agencies.

Justification:

The City of Houston requests one hundred and forty eight (148) frequencies for the installation of a 700 MHz trunked radio system. These channels will provide the needed capacity for the new radio system. The current systems do not have sufficient capacity to meet the needs of the existing users.

Funding Statement: System is being funded primarily from government grants, voter approved bonds and supplemented by city enterprise funds.

Give-Back Frequencies: None

Number of Sites Proposed: Forty eight (48)

Number of Channels Requested: One hundred and forty eight (148)

Number of subscribers: Ten Thousand (10,000)

Implementation Schedule: Implementation will be completed within twelve (12) months after the FCC has authorized the request of frequencies.

Is this request for a new system or expansion of an existing system? New System

The request is for the expansion of an existing system. No
