

**Matagorda COUNTY**  
**Sheriff's Department**  
**Sheriff Frank D. Osborne**

*APPLICATION FOR REGION 51*

Mr. Douglas Frankhouser, Chairman  
NPSPAC Region 51

Dear Chairman Frankhouser:

Matagorda County Sheriff's Department 700MHz application.

Matagorda County requests the reuse of six (6) radio channels by Region 51 for the aid in expansion of the Regional Project 25 (P25) trunked radio system. The addition of these frequencies are required to provide the coverage and loading for the growing number of users in this area of the regional P25 radio system.

These 6 frequencies we are requesting will be used at existing sites and for system expansion by adding additional sites to increase capacity for users to the system.

The requested frequencies are needed to establish a P25 interoperable communication system between Matagorda County and the existing Regional System. The P25 digital system is designed to bring the regional communications to the highest level of interoperable communications available.

The appropriate APCO, FCC forms and coverage maps have been completed and are attached. Coverage maps follow TIA/EIA TSB 88 guidelines and include interference area studies.

Equipment has been purchased and installed awaiting frequencies. The sites have been approved with grant funds and are in the process of being ordered.

Implementation will be completed within twelve (12) months after the FCC has authorized the request of frequencies.

Sincerely,

Jim Hendrickson  
Facilities Maintenance Supervisor

To Whom It May Concern:

Radio Communications

Adjacent Channel Interference

In all Harris County radio planning, careful attention is given to minimize radio interference on all radio channels. Most interference can be minimized through proper planning and engineering. However, in some cases, even where proper engineering has been employed, interference can be caused by equipment failure and/ or poor servicing techniques.

Concerning any or all Harris County radio sites and/or channels, Harris County Regional Radio Center is dedicated to the highest standards and performance that can be obtained in the industry. In the event of adjacent channel interference, or any type of interference which is caused radio equipment owned and maintained by Harris County, Harris County will correct the problem with its equipment or cease operation on that radio channel until the problem is resolved. If the interference cannot be remedied through normal techniques, and there is no equipment problem, Harris County will remove, re-license, and relocate the interfering radio channel to a new licensed physical location to resolve the problem and to adhere and conform to all standards approved in the NPSPAC Region 51 Plan.
