**APPLICATION FOR REGION 51
700 MHZ RADIO SPECTRUM**

Presented by Regional Radio Center

Craig Bernard, SR Director, Radio Services

Mr. Douglas Frankhouser, Chairman
NPSPAC Region 51

Dear Chairman Frankhouser:

Harris County ITC Regional Radio Center 700MHz application.

Harris County respectfully requests the reuse of twelve (12) radio channels by Region 51 for the expansion of our existing regional Project 25 (P25) Simulcast trunked radio system. The addition of these sites required to provide the coverage and loading for the growing number of users in this regional P25 radio system. **This is for the Harris County Simulcast that consists of the Gessner tower, Wallisville tower, Criminal Justice Center and T.Boone Pickens building. We would like to add the following sites to our existing simulcast system:**

Pasadena

Houston Transtar

Pearland

The P25 regional system has been established in Walker, Matagorda, Galveston, Montgomery, Fort Bend, Brazoria, and Liberty Counties. Chambers County has recently joined the Regional P25 system; these 12 frequencies we are requesting will be used at existing sites and for system expansion by adding additional sites to increase capacity for users to the system.

The requested frequencies are needed to establish a P25 interoperable communication system for migration of the existing 40000 analog users to the P25 digital system. The P25 digital system is designed to bring the regional communications to the highest level of interoperable communications available.

The appropriate APCO, FCC forms and coverage maps have been completed and are attached. Coverage maps follow TIA/EIA TSB 88 guidelines and include interference area studies.

Equipment has been purchased and installed awaiting frequencies. The remaining simulcast sites have been approved with grant funds and are in the process of being ordered.

Implementation will be completed within twelve (12) months after the FCC has authorized the request of frequencies.

Sincerely,

Bruce High, Chief Information Officer

To Whom It May Concern:

Radio Communications

Adjacent Channel Interference

In all Harris County radio planning, careful attention is given to minimize radio interference on all radio channels. Most interference can be minimized through proper planning and engineering. However, in some cases, even where proper engineering has been employed, interference can be caused by equipment failure and/ or poor servicing techniques.

Concerning any or all Harris County radio sites and/or channels, Harris County Regional Radio Center is dedicated to the highest standards and performance that can be obtained in the industry. In the event of adjacent channel interference, or any type of interference which is caused radio equipment owned and maintained by Harris County, Harris County will correct the problem with its equipment or cease operation on that radio channel until the problem is resolved. If the interference cannot be remedied through normal techniques, and there is no equipment problem, Harris County will remove, re-license, and relocate the interfering radio channel to a new licensed physical location to resolve the problem and to adhere and conform to all standards approved in the NPSPAC Region 51 Plan.
