

Region 51 meeting notes from Wednesday, July 31st, 2013.

The meeting basically followed the agenda. The Meeting began at approximately 0900 and adjourned shortly after 1100. The Meeting began with introductions. We did move things around by taking care business first.

Thomas Gilbert provided a short summary of the TXWARN Interop meeting notes from 7/23/2013. Doug Frankhouser provided a summary of the letter received from Sprint regarding operation of broadband technology using LTE on July 24th, 2013. There was discussion regarding the Cy-Fair VFD request – which has changed from the original request. Cy-Fair will use State of Texas 700 MHz frequencies. As such, it was informational only as the state will make the agreement with Cy-Fair and the RPC does not have a say. Harris County made a short presentation/discussion about the Pearland tower and moving the HAS frequencies from Pearland to Hobby Airport. A project presentation was made by E.F. Johnson. RCC made a presentation of radio coverage software. There were no other discussions and the meeting was adjourned.
