YOUNG MEN ABOUT CHANGE (YMAC)

RESIDENTIAL PROGRAM

2310 1/2 Atascocita Rd., Humble, Texas 77396

**Alicia Jackson
Program Supervisor
281-459-8010**

**Kerry Nyquist
Facility Director
281-459-8009**

The Harris County CSCD Young Men About Change (YMAC) Residential Program located in Atascocita is a 192 bed Intermediate Sanction Facility (ISF) designed to provide the Criminal Courts of Harris County with residential programming and aftercare supervision of moderate to high risk young adult male offenders evidencing the need of a structured residential setting to focus on changing criminal thinking and behavior.

TARGET POPULATION:

- Young adult male offenders, 17-25 years old and/or juvenile offenders 15-16 years old that have been certified as adults.
- Clients with moderate to high risk that would not usually be considered for community supervision or that would be considered for incarceration as a result of revocation for violations of conditions of Community Supervision.
- Clients assessed to have no identifiable substance abuse issues up to moderate levels.
- Clients with either felony or misdemeanor offenses are eligible. Misdemeanors must be assessed as high risk/needs and can comprise up to a maximum of 20% of the total program participants.
- Title 5 offenses are permitted; however, sex offenders are not eligible for YMAC.
- Clients can be stipulated either as an initial Condition of Supervision or Modified Condition of Supervision.

PROGRAM LENGTH:

- Residential phase – six months to twelve months
- Reintegration (Aftercare) phase – six months to twelve months

PROGRAM OBJECTIVES:

- Education – GED where needed
- Opportunity to change negative attitudes and behaviors
- Assume responsibility for own thoughts and behaviors
- Develop skills to succeed in a non-structured community setting

EXCLUSIONS TO ADMISSION:

- There are no recent suicide attempts or documentation of suicidal ideations precautions within the last ninety (90) days.
- Post surgical recuperation of less than four (4) months.
- Clients previously discharged from in-patient treatment for substantial program non-compliance must be approved by the YMAC administration.
- Significant mental retardation conditions
- Auditory/Visual Hallucinations
- Active Psychosis

- Clients with a history of mental health diagnosis requiring medications.
- Need of detoxification
- Dialysis or severe renal (kidney) disorders
- Chronic or severe stomach, colon, bowel disorders
- Seizure disorders NOT controlled by medication
- Chronic medications (evaluated on individual basis)
- Need for chronic pain management with prescribed narcotic medications
- Fractures
- Quarantine patients (Hepatitis, T.B., etc.)
- Presence of contagious diseases
- Heart/vascular and/or unstable blood pressure

WOMEN HELPING OURSELVES – ATASCOCITA (WHO-A)

2312 Atascocita Rd., Humble, Texas 77396

Kathy Black
Program Supervisor
281-459-8066

Kerry Nyquist
Facility Director
281-459-8009

The Harris County CSCD Women Helping Ourselves - Atascocita (WHO-A) is a 95 bed residential program designed to provide the Criminal Courts of Harris County with a residential program and aftercare support program for women with a Substance Abuse History.

TARGET POPULATION:

- Adult female offenders – any age
- Clients must have an assessed history of substance abuse and need a structured residential treatment program.
- Clients should have needs in the following areas:
 - Emotional Stability
 - Cognitive Deficiencies
 - Family Conditions
 - Interpersonal Relationships
 - Educational/Employment Issues
- Clients with either felony or misdemeanor offenses are eligible. Misdemeanors must be assessed as high risk/needs and can comprise up to a maximum of 20% of the total program participants.
- Clients with Title 5 and sex offenses are eligible.
- Clients can be stipulated either as an initial Condition of Supervision or Modified Condition of Supervision.

Harris County CSCD will also offer residential services in the community for up to 20 clients that are ineligible for the WHO Atascocita program due to pregnancy, new born infants, and medical or mental health conditions that can not be appropriately addressed at WHO Atascocita. These clients will be placed with **The Santa Maria Hostel** (contract residential treatment provider) located in the local community, which will offer similar gender-responsive treatment services as provided in the WHO Atascocita program. Clients with sex offenses are not eligible for placement at Santa Maria Hostel.

PROGRAM LENGTH:

- Residential phase – six months to twelve months
- Reintegration (Aftercare) phase – six months to twelve months

PROGRAM OBJECTIVES:

- Education – GED where needed
- Gender responsive treatment services – addressing their substance abuse
- Opportunity to change negative attitudes and behaviors
- Assume responsibility for own thoughts and behaviors
- Develop skills to succeed in a non-structured community setting

EXCLUSIONS TO ADMISSION:

- Pregnant females are not eligible for placement at WHO Atascocita
- Post Partum pregnancy – must have eight (8) weeks recovery and a medical release from the treatment OB/GYN

- Post surgical recuperation of less than four (4) months
- There are no recent suicide attempts or documentation of suicidal ideations precautions within the last ninety (90) days.
- Clients previously discharged from in-patient treatment for substantial program non-compliance must be approved by WHOA administration
- Significant mental retardation conditions
- Auditory/Visual Hallucinations
- Active Psychosis
- Clients with a history of mental health diagnosis requiring medications.
- Need of detoxification
- Dialysis or severe renal (kidney) disorders
- Chronic or severe stomach, colon, bowel disorders
- Seizure disorders NOT controlled by medication
- Chronic medications (evaluated on individual basis)
- Need for chronic pain management with prescribed narcotic medications
- Fractures
- Quarantine patients (Hepatitis, T.B., etc.)
- Presence of contagious diseases
- Heart/vascular and/or unstable blood pressure
- Bleeding disorders
- Prescription medication that alters present state of mind
- Stroke history with significant impairments
- Diabetes – oral medications and/or insulin dependent
