

DELETING CACHE & CACHE SETTINGS IN IE7

In Internet Explorer, select **Tools** from the standard tool bar. Then select **Internet Options**.

Deleting Cache:

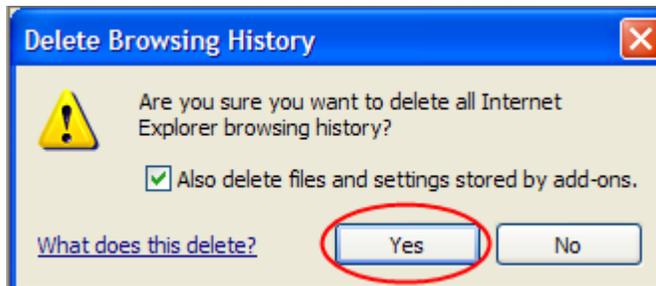

Select the **General** tab (usually the default). Select **Delete** button in the middle of the screen.

Select Delete All button.

Make sure box is checked and select Yes button.

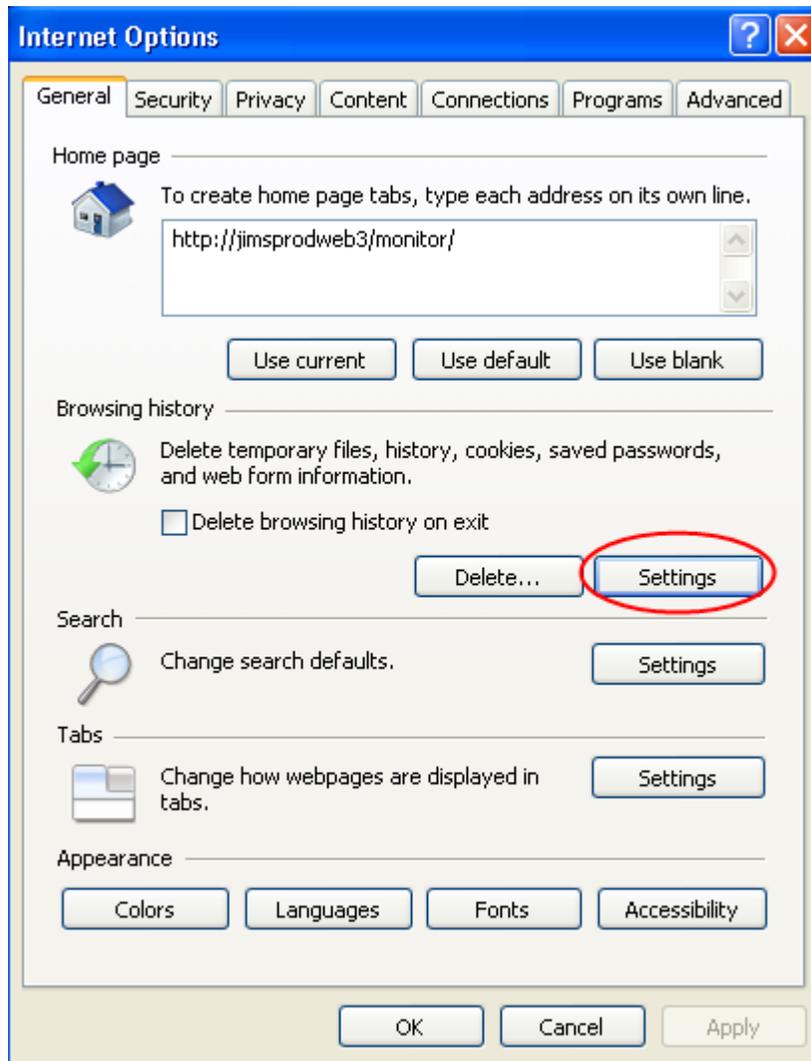

You will see the screen below and then it will return to the Internet Options screen.

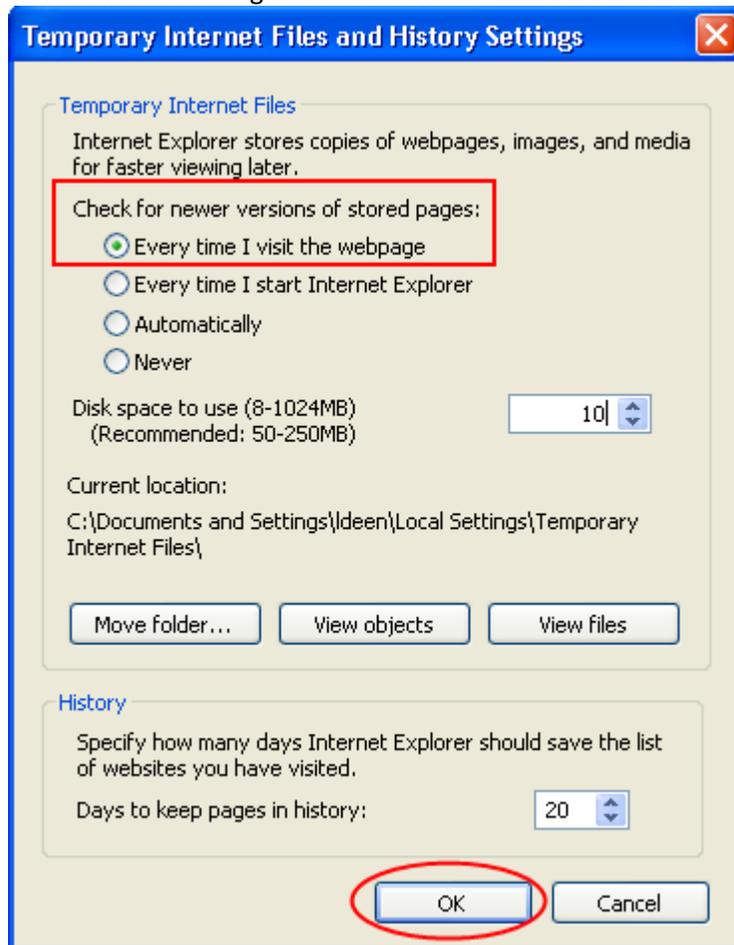

CACHE SETTINGS:

From the Internet Options screen-General Tab, click the Settings button.

Make sure the settings are as below and click OK button.

Click OK button to get out of screens.

Close down Internet Explorer and open it up again for the new settings to take effect.
